Affected Airspace:

Iraq airspace, all altitudes.

Applicability:

This CZIB applies to operators.

Description:

This CZIB is issued on the basis of information available to EU Member States and EU institutions. Due to the hazardous security situation, with the presence of terrorist organisations and ongoing high intensity military operations, there is a risk of both intentional targeting and misidentification of civil aircraft.

Due to the presence of various weaponry including MANPADS (man-portable air-defence systems), it is advised to be cautious with the risk associated to civil aviation. The risk to operations at all altitudes is assessed to be HIGH, except for airways UM688 and UM860. The highest airspace risk is estimated to be along the entire Iraq/Syrian border.

Additionally, the Agency draws the attention of the aviation community to the above referenced information, copies of which are attached to this CZIB.

Recommendation(s):

Operators should take this information and any other relevant information into account in their own risk assessments, alongside any available guidance or directions from their national authority
