

Safety Information Bulletin

SIB No.: 2014-22R1

Issued: 24 July 2014

Subject: Flight Operations to Tel Aviv Ben Gurion International Airport, Israel

Ref. Publications: None.

Applicability: National Aviation Authorities and aircraft operators.

Description: Due to the potentially hazardous situation created by the armed conflict in Israel and Gaza, EASA had issued SIB 2014-22 recommending airspace users to refrain from operating to and from Tel Aviv Ben Gurion International Airport (LLBG).

On the basis of information provided by the Civil Aviation Authority (CAA) of Israel and following coordination with the Federal Aviation Administration, SIB 2014-22 is hereby revised.

The Agency continues to draw the aviation community's attention to the necessity to closely monitor risks to the safety of international civil flights.

Recommendation(s): EASA recommends to the National Aviation Authorities (NAAs) to base their decisions for flight operations to and from Tel Aviv Ben Gurion International Airport (LLBG) in Israel on thorough risk assessments, in particular using risk analysis made by operators.

EASA will stay in close contact with the CAA of Israel which has committed to support and inform NAAs and operators immediately about any changes of the actual situation in Israel.

Contact(s): For further information contact the Safety Information Section, Executive Directorate, EASA. E-mail: ADs@easa.europa.eu.

This is information only. Recommendations are not mandatory.
